Clinical Imaging & Verification Report

Uncertainty-Calibrated & Adaptive Self-Verifying Pulmonary Assessment

REPORT
20110309

PATIENT & SCAN PROFILE

PATIENT ID	SCAN DATE	SCAN FORMAT	SLICES
Lung_Dx-B0041	20110309	Uploaded DICOM (1.dcm)	16

ESTIMATED CATEGORY

4A Suspicious

Calibrated Malignancy Risk: 52.3%

RISK TIER

INTERMEDIATE

Estimated diameter: 10.0 mm

ADAPTIVE VERIFICATION & RELIABILITY GATE

ADAPTIVELY_RESOLVED (CRI: 78.5%)

ADAPTIVELY_RESOLVED

Recommended Clinical Action

VERIFIED via Adaptive Re-Analysis: Initial inconsistency investigated and resolved with high multi-scale agreement (89.3%) and CRI (78.5%). Proceed with guideline-based clinical management.

TARGETED RE-ANALYSIS AUDIT TRAIL

Agreement with Baseline: 89.3%

* 1.25x High-Magnification Boundary Sh

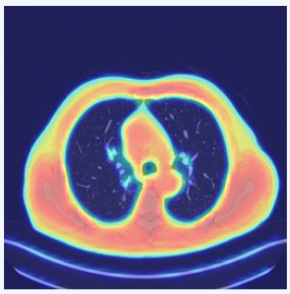

UNCERTAINTY & VERIFICATION INDICES

Epistemic Uncertainty	**0.0161**
Aleatoric Uncertainty	**0.6592**
Predictive Entropy	**0.6921**
Scan Quality Score	**73.9 / 100**
Grad-CAM Fidelity	**0.66 / 1.0**
Trait Physical Grounding	**0.75 / 1.0**

RADIOLOGICAL TRAIT EVIDENCE

Spiculation	**2.29**
Lobulation	**2.19**
Calcification	**3.33**
Subtlety	**3.32**
Margin	**1.75**
Sphericity	**2.20**

XAI LOCALIZATION & EVIDENCE GROUNDING

Estimated from diameter alone, assuming a baseline solid nodule. Nodule type, growth, and prior imaging were not available.
